# Double Sided Hexagon Table Topper

Fabric/Part	Cut
Hexagon Center	10.5" hexagon (see template)
Border #1	2 ½" x 14"
Border #2	1 ¾" x 14"
Border #3	2 ½" x 14"
Border #4	1 ¾" x 14"
Batting	27" x 27"

Note: you will need 2 sets of the above fabrics to make a double sided table topper. All seam allowances are ¼".

## Construction:

1. Download and cut out the template for the Hexagon centerpiece on template plastic or tissue paper. Or use a hexagon ruler of your choice.
2. Layer your 2 center fabrics and cut out your center hexagon using your template. Mark the registration points in each corner of the hexagon with chalk or a pencil. Set aside.
3. Cut your border fabrics as per the chart above into 14" strips. Note: you can use jelly roll strips. However, you will have slightly more fabric waste and will get three strip sets per jelly roll strip.

4. Sew all 4 border fabrics into strip sets in the order of the chart above. ( $B1 + B2 + B3 + B4 = \text{strip set}$ ). Press 3 strip sets towards Border #1 (up) and 3 strip set towards Border #4 (down), this will help with nesting your seams later.
5. Lay strip sets on your cutting mat with Border #1 at the top and Border #4 at the bottom closest to you. Align the  $60^\circ$  line on your ruler at the bottom of your strip set (along Border #4) and cut on the diagonal.
6. Measure across the top of Border #1  $5\frac{1}{2}$ " and make a small mark with chalk or a pencil.
7. Rotate your ruler; align it with the  $60^\circ$  line along Border #4 in the opposite direction as in step 5 and with the top of the ruler going through the  $5\frac{1}{2}$ " mark you made in step 6. Cut the strip set. (Border #1 should be the same length as one side of your hexagon.)
8. Repeat steps 5-7, making 6 identical trapezoids out of your strip sets.
9. Align one cut strip set with one side of your hexagon, placing right sides together. Pin through the registration points in the hexagon corners. These will be your start and stop points while stitching. Note: DO NOT stitch beyond either point as it will result in puckering.
10. Repeat step 9 for the remaining 5 sides, remembering to only stitch from dot to dot. Note: When placing strip sets on the hexagon, alternate between strip sets with seams pressed up and strip sets with seams pressed down so that every other set is pressed in the same direction.

11. Once all 6 strip sets attached to your hexagon, press all the seams from the hexagon towards the borders.

12. Fold your hexagon in half with right sides together. Align and nest your border seams on right and left. Stitch.

13. Repeat step 12 by refolding your hexagon to align the next two seams until all the seams are stitched together.

14. Press all seams flat facing to the left.

15. Repeat steps 1-14 on second side of table topper.

16. Layer your batting and table toppers in the following order: Batting, Table Topper #1 right side up, Table Topper #2 right side down. Your table toppers should be right sides together with all your seams aligned and your diagonal seams nested.

17. Trim your batting to the size of your Table Topper. Pin and stitch along the outer edge of your Table Topper. Leave a 6" inch hole of one side so that you can turn it.
18. Turn Table Topper right sides out. Press and slip stitch the opening closed. Quilt if desired.
